GUN-ARMED COUNTERMEASURE

4

5

ABSTRACT OF THE DISCLOSURE

6 A device for countermeasuring an underwater target is
7 provided. The device generally comprises a module having
8 inflatable buoyancy chambers that allow the module to hover at a
9 desired water depth, at least one acoustic array to detect the
10 underwater target, a propulsor system for orienting the module
11 with respect to the underwater target, and a gun for firing one
12 or more projectiles at the underwater target.
